*Cost includes instructional materials, snacks &
a pizza party on the final day.*

FINANCIAL AID AVAILABLE

(Micro)control your world!

We live in a world where everything
is computerized and automated...
down to the “micro” level!

Explore the world of microcontrollers, electronics
and circuits, as well as how to program your very own
microcontrolled robot during **iTEAMS Xtreme: Next Generation**.
Robot competitions throughout the camp, such as
Dance Robot Dance and *Robot Wars*, will showcase
what students have learned.

For veteran Next Gen campers, we’re offering **iTEAMS Xtreme: Next
Generation 2.0**. During this advanced camp track, students will become
Arduino Game Makers and learn how to create game tools such as a
stopwatch, randomized die, buzzers and sensors. They’ll use the tools to build
and play Arduino games. *Game on!*
